**LED poster
digiroll-up**

Casino floors have a lot of different signs for directing visitors to desired locations and most of the such signs are static and very often not illuminated. We recognized this problem which is why we created our line of various LED signs. Our informational LED signs are different, vivid, dynamic and eye catching and can be packed in any shape, size and design to fit our customers needs.

To make everything even easier - all our signs are remotely controlled, either via a WI-FI, CLOUD service, USB or other options.

Our informational LED signs come in several different shapes - standard flat, circular, conical, rounded and waiting line post shape. Control is quick and easy. A user can create all signs and individually control them via the same computer by several connection ways - a net cable, WI-FI, internet, cloud service and other.

LED poster digiroll-up

Our LED poster screens come in standard size 64 x 192 cm with pixel pitch P2.5. Screen resolution is 256 x 768 pixel. This LED poster is the best solution for on site advertising or use as information panel.

Our LED poster screen is easy to control, thanks to included media player which can be feed over net port, WI-FI, cloud service, 4G mobile data or simply over USB port.

Back side of LED poster screen have integrated powerfull media player device with all common connection and possibilities to control the LED poster screen.

LED info screens

Our info screens come in several different sizes with LED pixel P2 mm. Standard resolution is 256 x 128 pix., 384 x 192 pix. and 512 x 256 pixel. All LED screens came with magic programable LED acrylic edge. All custom sizes and resolution is possible on request.

LED waiting poles

Our LED waiting poles is just digital upgrade to very well known classic queue barrier posts stands - we name it LED waitng poles. Each came with vertical LED digital screen in P2.5 which give just right pixel resolution to show short messages or video or animation. With LED waiting poles we also supply the barrier rope - same as is use for classic post stands.

All aspects of the informational LED screen system are fully customizable and can be made according to the customers needs. We also offer a graphic design service for all customers to create personalized content. For more information please email: cds@cds.si.
