Lucky rings

Building on the classic look of three-wheel slot game, we created a large promotional digital version of the same game with multi game functionality, offering more options and creativity to its users. We call it the Lucky Rings. The design is universal and it offers the users the possibility to create fully customised games. Users can use a variety of preinstalled numbers and symbols or design their own symbols using Lucky Rings design software. The Lucky Rings can be used for variety of attractive games and promotions in hotels, shopping malls, promotional events, casinos and game rooms.

The device includes control software which offers more setup combinations of the winning symbols - from 16 symbols unwards. Users can design their own symbols and assign different parameters for each of them - for example probability rate, speed and duration of spinning, appearance, sound, winning symbols, main screen, demo mode etc. Game upload to Lucky Rings is quick and easy, it only takes a few seconds, all you have to do is save the game to a USB key and insert it into the Lucky Rings console.

Custom design graphics for the background can be done by the user

Empty space for winning prize graphics

When 3 equal symbol align the winning prize graphics is displayed

Custom design symbols can be implemented by the user

Custom design winning graphics can be implemented by the user

All aspects of the Lucky Rings game console are fully customizable and can be personalized on request. We also offer a graphic design service to all users to create their own symbols and graphics by demand. For more information please email: cds@cds.si.
