16 symbol software screen

20 symbol software screen

32 symbol software screen

64 symbol software screen

Building on the classic look of wheel of fortune, we created a new digital version of the same game with a multi game functionality, offering more options and creativity to its users. We call it the Lucky wheel.

The design is universal and it offers the users the possibility to create fully customised games.

Users can use a variety of preinstalled numbers and symbols or design their own symbols using the Lucky Wheel design software. The Lucky Wheel can be used for variety of attractive games with CMS and for promotions in hotels, shopping malls, promotional events, casinos and game rooms.

The device includes control software which offers four setup combinations of the winning symbols -

**16, 20, 32, 37, 38, 52, 54** or **64** symbols. Users can design their own symbols and assign different parameters for each of them - for promo use you are able to set probability rate, speed and duration of spinning, winning cursor shape, appearance, demo mode etc. Game upload to the Lucky Wheel is quick and easy, it only takes a few seconds - all you have to do is save the game to a USB key and insert it into the Lucky Wheel console.

20x

64x

32x

**Optional -  
BINGO GAME**

**Optional - ROUND, ELIPTIC, HALF-MOON  
OR OTHER SHAPE TOP TOPPER**

When use with QR code terminal stand is combined with NFC - RFID card reader and touch screen monitor. This also make CMS connection possible with our API to different CMS systems.

Different press & play buttons can be customized and ordered separately. It can be integrated with the main game, terminal stand with screen and printer, separate stand only or desk mounted stand.

Center screen and optional LED topper is fully programmable with animations and videos. All aspects of Lucky Wheel game console can be personalized on request.
