

LED DISPLAY POSTS

LED info waiting Poles

Our LED info waiting poles are built to last using latest LED technology & only highest quality build materials. Full metal body ensures high durability for professional use. We offer two versions (one sided LED display or three sided LED display option). For both versions you have three height options (small, medium and large).

Most Casinos still use static non-illuminated waiting poles which are not usable inside flashy environment. So make the difference and use our products as unlimited visual experience to attract visitors attention.

Share information's by your choice and encourage people to follow your path.
